

# Campus Identity and Access Management Services

Charlie Calderón <[charles.calderon@wisc.edu](mailto:charles.calderon@wisc.edu)>

Tom Jordan <[tom.jordan@wisc.edu](mailto:tom.jordan@wisc.edu)>

Jon Miner <[jon.miner@wisc.edu](mailto:jon.miner@wisc.edu)>

# Who are we and what do we do?

- Coordinate the Identity and Access Management Service Domain
- Aggregate identity matching and de-duplication across institutional IT systems (Person Hub)
- Aggregate person data used for application authorization
- Host infrastructure for institutional authentication, authorization and provisioning / deprovisioning
- Consult with application owners on identity lifecycle and integration
- Work with campus data and system owners to define policy and process for identity data
- Work with external service providers and identity federations to enable cross-institution access to resources

# What services can we provide to application owners?

- Pre-purchase consultation on identity integration
- RFP consultation for compliance with campus identity systems and policies
- System / application identity lifecycle consulting
- Assistance in integrating applications to campus identity infrastructure
- Consultation on grouping / authorization management strategies
- Access to identity, grouping and authorization data
- Consultation on cross-institutional authentication and access management initiatives

# How to engage with us

For assistance in configuring applications with NetID Login:

[help@login.wisc.edu](mailto:help@login.wisc.edu)

For access to identity data:

<https://it.wisc.edu/services/iam/>

Other requests:

[mstsupport@lists.wisc.edu](mailto:mstsupport@lists.wisc.edu)

# Future developments

- Strong Authentication (including Multi-Factor Authentication)
- Service / Application accounts
- Privileged Account Management
- Non-web integration with NetID Login Services
